

# Biological Urinal Blocks

## Product Information Sheet

### Product Description:

These urinal blocks are an environmentally friendly alternative to paradichlorobenzene (moth ball smelling) blocks. They come with a screen or without a screen, but in plastic housing for applications where a mental dome may be in urinal drain or for waterless type urinals.

### Benefits

- Each block treats urinals up to 1800 flushes.
- Patented flexible screen traps solids from entering urinal.
- Screen is designed to reduce back splash and is recyclable.
- Blocks without screens have plastic housing around them for easy handling.
- No additional plastic bags/wrappers to throw away.
- Cleans with every flush.
- Each block contains billions of beneficial microbes for odor control.
- Fresh, pleasant fragrance.

### **Comments**
