

SST-75L

Liquid Biological Formulation For Grease Digestion

Product Information Sheet

Product Description

SST-75L is a biological formulation designed to improve the degradation and digestion of fats, oils and grease as well as other organic substances and deposits which cause odors, line blockages and expensive repairs or maintenance. SST-75L is environmentally friendly and does not contain harsh chemicals, acids or caustics. SST-75L contains a specific blend of vegetative and spore based microorganisms selected for their superior degradation performance and demonstrated growth abilities in aerobic and anaerobic environments. SST-75L is ideal for drain lines, grease traps, septic systems and leach fields where organic build-up slows drainage, produces foul odors and causes excessive wastewater maintenance.

Benefits

- Environmentally friendly
- Restores wastewater systems
- Works on the molecular level, eliminating odors
- Degrades organic substances in drain lines
- Reduces maintenance costs

Product Specifications

Appearance: Opaque Liquid

Color: Green

Odor: Musty

PH range: 5.0-9.8

Microbes: Vegetative and Spore based non-pathogenic strains (Salmonella, Shigella free)

Count: >50 billion C.F.U./gallon

Storage & Handling: Store in a cool, dry, dark place. Keep lid on container when not in use

Keep out of reach of children

Shelf life: 1 year at 35° F-90° F

Comments:

Read MSDS before using. Avoid inhalation, wash hands after contact, and avoid eye contact. Call Bio Quest Environmental Products for specific application rates for your situation.
